

SAP Practice

SAP ERP Central Component (ECC) 6.0 Performance Tuning

SAP AP Business Suite ERP 2005 (ECC 6.0) Performance Tuning services from COMSYS enable our clients to take full advantage of SAP's ECC 6.0 systems. With ECC 6.0, organizations can take advantage of enterprise service-oriented architecture and optimizing business processes and scenarios. Conversely, poor performing environments decrease productivity, impede business processes and adversely impact user acceptance. A properly tuned and maintained ECC 6.0 environment is critical to maximizing any organization's SAP investment.

COMSYS, an SAP Services Partner, can help you maximize this investment and minimize performance-related issues while optimizing system response and report times. Partnering with our SAP Solutions Practice affords clients access to our domain expertise in SAP performance optimization across a variety of common database and operating system platforms.

Our clients have relied on us to plan, measure, analyze, deploy, and verify performance adjustments in these areas:

- Operating System (Windows, AIX, HP-UX, Linux, Solaris, z/OS, OS/400)
 - CPU and Memory workload analysis
- Database (MS SQL, Oracle, MaxDB, DB2)
 - Database tables and indexes
 - Database accesses and utilization
- SAP Applications (ABAP and Java stacks)

SAP Practice

Our SAP certified consultants can assist customers in identifying and resolving performance issues and have worked with a variety of Fortune 1000 clients to provide performance tuning expertise at every level of the SAP ECC 6.0 integrated technology platform. Their performance tuning best practices experience spans all SAP-supported database and operating system platforms, and SAP implementations.

CLIENT BENEFITS

Engaging COMSYS to assist an organization with their ECC 6.0 performance tuning initiatives results in better response times and improved system availability. ECC 6.0 performance tuning will have tangible benefits including increased user satisfaction, increased productivity, and reduced cost of ownership.

Key benefits are:

- Optimized system performance
- Maximized use of hardware resources
- Reduced service desk calls
- Reduced Total Cost of Ownership

SOLUTION SUMMARY

COMSYS' SAP ECC 6.0 performance tuning consultants use proven strategies and methods to help our clients maximize the performance of their SAP ECC 6.0 environment. Our consultants have extensive experience implementing change and minimizing associated risks. SAP ECC 6.0 performance tuning with COMSYS SAP consultants helps organizations achieve a lower TCO, greater user productivity and improved flexibility in business processes. COMSYS' SAP Practice helps clients maximize the returns on their SAP investments.

COMSYS' ERP Practice consistently delivers industry-leading SAP, Oracle, JDE and PeopleSoft solutions to a broad range of clients around the globe. With flexible delivery options ranging from staff augmentation to fully outsourced solutions, COMSYS can custom-tailor a solution for any need. With over 5,000 active consultants and employees, a 35-year history of success, and revenues approaching the billion dollar mark, COMSYS is setting the standard for technology consulting organizations around the world.
