

SAP Practice

SAP Interface and Integration Design

Integrating SAP with a multitude of disparate systems can be quite a challenge. Whether your business requires integrating legacy systems and SAP, interfacing an enterprise application integration via eXchange Infrastructure (XI) with the technological world or communicating exclusively with SAP's suite of packages utilizing Application Link Enabling (ALE), COMSYS' SAP practice has the knowledge and the expertise required to guide your organization through the process of making systems talk to one another.

As with any SAP endeavor, an upfront As-Is Analysis ensures project success and mitigates unnecessary risk. First and foremost, obtaining a solid understanding of a client's system landscape is crucial. During this phase, COMSYS' experienced SAP consultants thoroughly assess the specific nuances unique to your organization's IT infrastructure to determine how the current landscape should be fine-tuned.

The importance of this step cannot be underestimated. All too often direction, movement, energy, time, and resources are set into motion without properly performing the fundamental due diligence. COMSYS calls this phase the "As-Is" Analysis.

During this "As-Is" Analysis, COMSYS will assist the client in the following areas:

- Perform a thorough systems landscape assessment including interviews with key client resources responsible for each of the relevant components such as:

ABOUT COMSYS

- One of the largest IT services and solutions company in North America with revenues over \$750 million
- 52 offices in the US and Puerto Rico with additional offices in Canada and the UK
- Dedicated SAP Service Line:
 - SAP-Gold Consulting Partner
 - SAP-Certified "Services Partner"
 - Over 12 years of SAP Consulting Experience
 - 250+ Consultants
 - Extensive Relationships with Global SAP Partners
 - Offshore Development Center
- System Architects
- Infrastructure Owners
- ERP System Owners
- Networking Engineers
- Build a visual systems landscape "As-Is" deliverable.
- Review the documented assessment with key landscape owners to ensure that our SAP architects' findings are accurate.

Do business. **We're IT.**

SAP Practice

Once the “As-Is” Analysis is completed and approved by you, the client, the next step is to determine the optimal landscape design and its integration.

A number of factors are considered during this process such as:

- Size of the Infrastructure
- Organizational Needs
- Legacy System Sunsetting Opportunities
- Long-Term SAP/ERP Systems Vision
- EAI Feasibility

After all key variables are thoroughly discussed and the proper direction to take is clearly identified, integration is then implemented. COMSYS’ proven SAP Methodology and experienced PMBOK- and ASAP-certified project managers have the knowledge, work ethic and discipline required to properly execute and drive SAP integration initiatives. Sound design, while fundamental to success, cannot suffice on its own. Our SAP consultants understand the latest technologies available, how they benefit clients in varying situations, and they possess the capability to implement ALE, XI and BAPIs/APIs.

Their successful interface and integration track record is further based on being able to:

- Minimize Scope Creep
- Thoroughly Understand SAP Interfacing Technology
- Establish Proper Time Line and Resource Management
- Identify Any Challenges that Were Not Identified in the “As-Is” Analysis
- See Implementation Through to Going Live

SOLUTION SUMMARY

COMSYS’ ERP practice is a trusted SAP interface and integration partner. Utilizing COMSYS to revamp your SAP system architecture and ERP landscape from the very beginning not only mitigates your exposure to risk, but our extensive SAP experience and depth of knowledge saves your enterprise both time and money.

CLIENT BENEFITS

Key Benefits to Engaging COMSYS in SAP Interface and Integration Design:

- “As-Is” Analysis and Deliverables
- Optimal Landscape Design Planning
- Efficient and Cost-Effective Integration Execution
- PMBOK and ASAP Methodology Driven
- Support Capabilities

COMSYS’ ERP Practice consistently delivers industry-leading SAP, Oracle, JDE and PeopleSoft solutions to a broad range of clients around the globe. With flexible delivery options ranging from staff augmentation to fully outsourced solutions, COMSYS can custom-tailor a solution for any need. With over 5,000 active consultants and employees, a 35-year history of success, and revenues approaching the billion dollar mark, COMSYS is setting the standard for technology consulting organizations around the world.
