# SAP Netweaver Business Intelligence Implementation

COMSYS' SAP Netweaver, Business Intelligence planning, landscape design and implementation services enable you to take full advantage of SAP's premier business intelligence platform. Utilizing SAP's Netweaver Business Intelligence provides a comprehensive set of data warehousing tools that allow your enterprise to quickly create and deploy graphical, interactive reports and applications.

Netweaver's Business Intelligence (BI) extends business intelligence to all user types at all organizational levels. Some key features include:

- Improved enterprise dashboards
- Formatted reporting
- Increased focus on user productivity
- Enhanced information broadcasting
- MS Outlook integration
- More intuitive ad hoc analysis
- Advanced Excel integration
- Flexible data modeling capabilities
- Web-based administration cockpit
- Built-in PDF export capability

COMSYS ERP's SAP practice continually maintains the highest level of knowledge regarding the latest business intelligence techniques and tools available from SAP. Our certified Netweaver and BI consultants can assist you in identifying which new technologies are best for satisfying your business requirements.

Do business. **We're IT.**

## SAP Practice

COMSYS, an SAP-Certified “Services Partner,” assists businesses with Netweaver BI installations and upgrades using the Accelerated SAP (ASAP) Methodology combined with Project Management Institute (PMI) Best Practices. This process allows for quicker deployment and lower implementation costs, while maintaining the highest level of quality.

COMSYS’ implementation methodology is both flexible and uniquely responsive to the specific needs of our clients. COMSYS guides you through the process of implementing SAP Netweaver BI by leveraging the implementation road map provided within SAP’s Solution Manager. If your organization chooses to employ its own implementation strategy, we’re here to assist you every step of the way.

Our PMI-certified engagement and project managers drive SAP projects by incorporating SAP Solution Manager’s five phases, which can be customized for environments with varied complexities or regulatory requirements.

These project phases are as follows:

- **PHASE 1: Project Preparation**
  - Document current and proposed technical infrastructure
  - Project management plan
  - Project team training
- **PHASE 2: Blueprint**
  - Define security, testing and training plans
  - Analyze business processes and reporting requirements
  - Determine BI content to be activated
- **PHASE 3: Realization**
  - Install all nonproductive environments
  - Create business process maps, data mapping, and data warehouse models
  - Execute application, interface and data transformation test plans
- **PHASE 4: Final Preparation for Cutover**
  - Final integration testing
  - User training
  - Creation of COE for go-live support

- **PHASE 5: Production Cutover**

- Installation of production environment
- Configuration and setup validation
- Post-go-live support, project documentation, review and closure

### CLIENT BENEFITS

Engaging COMSYS to assist with your SAP Business Intelligence project offers tangible benefits:

- Proven, repeatable project management techniques
- Experience with the latest software solutions
- Hardware and database independence
- Objective, candid, constructive feedback
- SAP-Certified Consultants, both technical and functional

### SOLUTION SUMMARY

Our consultants can assist you with your business intelligence projects in a reasonable time frame and at a competitive cost, all guided by knowledgeable and technically adept project managers. Our goal with any SAP Business Intelligence project is to lower your total cost of ownership while increasing the value of your technology infrastructure.
