Here's how COMSYS can help your business manage your next SAP endeavor:

- **We Possess SAP Project Management Expertise.** COMSYS has years of experience as one of the nation's leading IT consulting companies, allowing us to execute cost-effective, client-focused SAP projects that address your most pressing business issues. Our project managers are typically certified in a broad range of project services methodologies and are highly experienced in a wide range of market verticals and industries. COMSYS believes that its project managers should have project management experience with SAP products and possess hands-on business knowledge.

Do business. **We're IT.**

SAP Practice

- **We Utilize Leading Project Management Methodologies.** COMSYS project managers are fully certified and utilize a variety of project management methodologies depending upon your specific needs. Accelerated SAP (ASAP), the Project Management Institute's PMP, Total Quality Management such as Six Sigma or Lean, and our own Integrated Project Methodologies (IPM) are among the many methodologies our project managers are knowledgeable in and are able to leverage.
- **We Understand Your Business.** COMSYS understands your business and knows how to integrate SAP in order to meet your business needs. No matter what industry your business resides in—healthcare, telecommunications, energy and utilities, manufacturing, financial services, insurance or the public sector—we understand your business and the unique challenges you face.
- **We Are Flexible.** Methodology alone is not sufficient for successful SAP project delivery. Nor does a single project management style fit every client. Many years of SAP project management experience across a wide range of SAP products (both old and new versions), environments (global implementations and smaller installs) and business models provides you with a knowledge base of implementation strategies and expertise that can easily be applied to your specific business needs.
- **We Leverage Our Internal PMO.** COMSYS has a dedicated Enterprise Project Management Office (EPMO) that supports our Managed Solutions group. Leveraging COMSYS' internal PMO provides our project managers with the proper tools and quality assurance practices. This dedicated resource adds value to your business projects by enabling access to methodologies and processes information, delivery support and independent quality assurance (QA) reviews. Additionally, this internal QA mechanism ensures that COMSYS' project managers are held to the highest quality standards.

- **We Achieve Measurable Results.** A single, guiding principle is at the heart of COMSYS' SAP project management services: To work closely with you, the client, to deliver cost-efficient, measurable SAP solutions that fully meet and support your business needs and objectives. We do this by drawing upon our vast experience gained in a multitude of assignments in virtually every industry, utilizing flexible methodologies and a variety of delivery solutions. Working closely with a structured and fully defined project plan, COMSYS' project managers are able to accurately measure the scope, progress and results of your SAP project.

SOLUTION SUMMARY

Your business can rely on COMSYS to deliver expert SAP project management services that ensure the success of your SAP endeavor. Our experience, business knowledge and an emphasis on measurable results have helped us develop a proven track record of helping clients maximize the value of their organization's projects while minimizing the risks. Engaging COMSYS' highly experienced, flexible project managers provides you with a business partner dedicated to on-budget and on-time project delivery.

COMSYS' ERP Practice consistently delivers industry-leading SAP, Oracle, JDE and PeopleSoft solutions to a broad range of clients around the globe. With flexible delivery options ranging from staff augmentation to fully outsourced solutions, COMSYS can custom-tailor a solution for any need. With over 5,000 active consultants and employees, a 35-year history of success, and revenues approaching the billion dollar mark, COMSYS is setting the standard for technology consulting organizations around the world.

Do business. **We're IT.**
