# mySAP ERP 2005 Upgrade

COMSYS' ERP upgrade planning and implementation services enable existing SAP customers to take full advantage of all the enhancements and efficiencies gained with the release of mySAP ERP 2005.

mySAP ERP 2005 continues to build upon the solid foundation of mySAP ERP 2004. Utilizing the Netweaver platform, COMSYS' ERP software solutions are no longer information silos like traditional ERP systems of the past. The Netweaver platform is easily integrated into any environment, and it efficiently allows for the incorporation of other SAP or third-party solutions.

COMSYS, an SAP-Certified "Services Partner," has the capability to assist you with upgrades from legacy R/3 and ERP 2004 environments to mySAP ERP 2005, using the Accelerated SAP (ASAP) Methodology combined with Project Management Institute (PMI) Best Practices. This proven process allows for quick deployment and lower implementation costs while maintaining a high level of quality control.

COMSYS guides its SAP customers through the upgrade process by leveraging the upgrade roadmap provided within SAP's Solution Manager. This road map is built upon the experiences of our consultants and SAP's expert knowledge of software solutions. COMSYS' upgrade process is broken down into five phases, which can easily be customized for environments with varied complexities or regulatory requirements.
